Robust mitten with a service temperature of up to 900 degrees Celsius.

Mitten made of IHR-coated fibreglass.

The mitten can be used on both sides, has good mechanical resistance and also has good resistance against welding flashes and splashes of molten metal. The mitten is also very suitable to hold and move hot objects.

The mitten is supplied in one size.

The mitten must not be washed.

Used palm-side materials:

- IHR-coated fibreglass
- Voluminous fibreglass
- Light-duty Para-aramid felt

Used materials on the back:

- IHR-coated fibreglass
- Voluminous fibreglass
- Light-duty Para-aramid felt
