

M SAFE®

M-Safe Knucklehead X10K

INNOVATION FROM THE USA

- The palm of the glove is made of Armor Skin®
Armor Skin® is a special synthetic fiber in the palm area that is lightweight, washable and breathable. Armor Skin® fiber is actually pound for pound more durable and wear resistant than natural leather
- Glove is completely sewn with Kevlar® yarn
- PVC anti slip tool grip holder at index finger side with neoprene padding for impact absorption
- PVC anti slip double wishbone palm patch with double breakpoints preventing bunching up. Lined with neoprene padding for impact absorption
- Triple sewn
- Full finger & backhand shock absorbing thermoplastic rubber protection to prevent pinching and back hand injuries
- High absorbency terry cloth brow wipe
- The pre-curved fingers follow the natural contours of the hand
This results in a very comfortable glove
- Contrasting high visibility materials
- Elastic wrist
- Sizes: 9 - 11

Applications

- Offshore industry
- Construction and metal sector
- Oil and chemical industry
- Maintenance
